

Note Names Card Game

by Beatrice Wilder

The following set of playing cards is meant to be printed out on a stiff paper (not less than 110 gsm) or a light board and then laminated before being cut.

Trim the laminate from the edges of the paper before cutting. A cutting template is provided but the printed sheets simply need to be cut in half and then in half again and then again so that eight cards are formed from each sheet.

A pattern (also provided) to be printed on the reverse will help to prevent the printing from being seen when the cards are turned over.

'Memory' or 'Concentration'

Turn all the shuffled cards face down on a surface (table or floor) and each player (two or more players) takes turns choosing two cards to find matching pairs. Each time a player finds a matching pair he or she may have another turn. The player with the most cards wins the game.

Go Fish (for two or three players)

Deal each player five cards. Place the remaining cards face down in a draw pile.

Choose a player to go first. The player whose turn it is may ask another player for a specific card so that matching pairs can be formed. If another player has the card asked for, they must hand it over.

If a player gets the requested card he or she also gets another turn.

If the person you ask does not have the card you need, they say, "Go fish" and the player then has to take the top card from the draw pile.

The object of the game is to form pairs of cards which the player then places on the table in front of him or her. The player to first form pairs of all the cards in his or her hand is the winner.
